FOR IMMEDIATE RELEASE

ImageBEAM Launches New Website

The New Site will Showcase the Company's Newly Added eCommerce, Intranet and Extranet Services

IRVINE, Calif. – Nov. 10, 2008 – Adding to world-class rich media and website development services, **ImageBEAM** announced today the launched of its newly redesigned and improved website, ImageBEAM.com. The site features a new array of web development services and solutions for eCommerce websites, Intranet and Extranets.

Catering to the needs of small and medium-sized businesses, ImageBEAM's new product offering will provide clients with a one-stop shop for innovative web development and rich media production services that make an impact. "The convergence of web and rich media technologies has raised everyone's expectations of what's possible around using the web for communication, information sharing, shopping and engaging, collaborative experiences," said Liam Kennedy, CEO of ImageBEAM.

Key partnerships with software developers like AspDotNetStorefront and Microsoft have allowed ImageBEAM to expand its service offering. ImageBEAM leverages AspDotNetStorefront's shopping cart platform for the development of eCommerce solutions, while Microsoft's SharePoint Server (MOSS) is used to build Intranet and Extranet sites.

"ImageBEAM continues to look for best-of-breed technologies to serve clients with affordable solutions that add value to their online strategies," added Kennedy. "The continuous demand for these services prompted our decision to expand our offering and redesign our website, which we anticipate will have a positive reception from our clients and new visitors."
